Q2. (iv)

A . SELECT * FROM Student;

B. SELECT StudentId, Name, City FROM Student WHERE City = 'Kandy';

C . UPDATE Student SET City = 'Galle' WHERE StudentId = 4;

D . SELECT Student.*, Course.Name FROM Student JOIN Course ON Student.CourseId = Course.CourseId;

Note

The "Add Student" page in my web application isn't working properly. I tried many ways to fix it, but I couldn't solve the issue.
